

Body worn solutions for healthcare

Sleek wearable cameras for a safer workplace

Designed for the healthcare workplace, lightweight body worn cameras from Axis help improve safety, deter unwanted behavior, and increase transparency.

Healthcare challenges to solve

Safety and security:

Deter bad behavior and create a safe environment.

Documentation and liability:

Deter unwarranted claims.

Compliance and transparency:

Improve ways of working.

How Axis supports healthcare

Axis body worn cameras in healthcare settings provide a visual and audio record of interactions between healthcare providers and patients, promoting transparency, accountability, safety, and trust. This helps create a safe environment for employees and patients alike.

Video captured by Axis body worn cameras is encrypted, stored securely, and regulated by healthcare administrators, helping prevent HIPAA violations..
